MINHAJ TAHIR KHAN

Web Developer

Karachi, Pakistan | 03351313645 | minhajtahir2020@gmail.com | linkedin.com/in/minhaj-tahir-khan

PROFESSIONAL SUMMARY

Web Developer with a B.S. in Software Engineering and hands-on experience in Frontend and Full-Stack development using the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in building responsive, component-based user interfaces with HTML5, CSS3 (Flexbox, CSS Grid), JavaScript (ES6+) and React.js, and in developing and integrating RESTful APIs with JSON data exchange, JWT authentication and CRUD operations. Experienced in Git version control, API testing with Postman, cross-browser compatibility, debugging and Agile/Scrum workflows. Quality-focused developer with 1+ year of SQA experience in unit, regression and end-to-end testing (Cypress), producing clean, maintainable and bug-free code.

TECHNICAL SKILLS

Frontend Development: HTML5, CSS3, JavaScript (ES6+), React.js, React Hooks, Component-Based Architecture, Single Page Applications (SPA), DOM Manipulation, Bootstrap, Flexbox, CSS Grid, Responsive Web Design, Mobile-First Design, Media Queries, Cross-Browser Compatibility, Fetch API, AJAX, Async/Await, Promises

Backend Development: Node.js, Express.js, RESTful API Design & Integration, CRUD Operations, MVC Architecture, Middleware, JWT Authentication, Authorization, JSON, Client-Server Architecture, HTTP Methods & Status Codes, CORS

Databases: MongoDB (NoSQL), Mongoose ODM, SQL, Relational Database Concepts, Data Modeling, Query Writing, Data Integrity & Validation

Tools & Version Control: Git, GitHub, npm, VS Code, Postman, Chrome DevTools, Jira, ClickUp, JMeter

Testing & Quality Assurance: Cypress (E2E Test Automation), API Testing, Functional Testing, Regression Testing, UI Testing, Debugging, Defect Tracking, Test Case Design

Methodologies: Agile, Scrum, SDLC, STLC, Code Review, Sprint Planning, Bug Lifecycle Management

PROJECTS

EventSphere – Event Management Platform (MERN Stack)

- Worked on a full-stack MERN (MongoDB, Express.js, React.js, Node.js) event management application covering event creation, user registration and persistent data storage.
- Tested and validated RESTful API endpoints with Postman, verifying JSON request/response payloads, JWT authentication tokens, HTTP methods and edge-case status codes (2xx/4xx/5xx).
- Verified frontend-to-backend data flow and ran SQL/database queries to confirm data integrity and CRUD consistency after each transaction.
- Performed UI, functional and API testing end to end, documenting defects with reproducible steps, severity levels and resolution status.

WORK EXPERIENCE

Faculty Member – Aptech | April 2024 – Present

- Mentored 50+ students in the software development lifecycle (SDLC), Git version control, code review practices, REST API fundamentals with Postman and Agile/Scrum methodology.
- Designed and delivered hands-on curriculum covering SQL, database management, relational data modeling and API integration, linking classroom concepts to real industry workflows.
- Guided students through complete project cycles, from requirement analysis and implementation to testing, debugging and defect documentation.

SQA Engineer (Web Applications) – VertexInvo | September 2023 – April 2024

- Tested web applications across major browsers and mobile viewports, building compatibility matrices that caught responsive-layout and UI defects before production.
- Validated REST APIs with Postman, checking JSON payloads, HTTP status codes (2xx/4xx/5xx) and request/response contracts to confirm frontend-backend integration.
- Logged, assigned and tracked 100+ defects in Jira, collaborating daily with developers in Agile sprints to resolve issues within SLA.
- Executed regression and UI testing on each build release, increasing test coverage and reducing post-release defect leakage.

Front-End Developer Intern – Hudasoft | May 2022 – July 2022

- Developed responsive front-end layouts using HTML5, CSS3 and Bootstrap, ensuring consistent rendering across devices and browsers.
- Performed cross-browser and UI testing, then identified, documented and fixed front-end defects to improve usability and performance.

EDUCATION

Bachelor of Science in Software Engineering | 2020 – 2024
Umaer Basha Institute of Information Technology, University of Karachi | GPA: 3.0 / 4.0

VOLUNTEER WORK

- Mera Brand Pakistan, Expo Center Karachi (2024 – 2026)
- Job Fair, UBIT-KU (2023)
